Dear Dr. Henney:

I urge you to ban the use of human antibiotics in animal feeds. It shocks me that a 1997 recommendation by the World Health Org. has been ignored. That we lag way behind in addressing this problem. It is particularly disturbing when industrial production of animals has so many adverse public effects on protection of adjoining streams.

I am reading British magazines and finding wide spread opposition to this policy of permitting antibiotics in animal feed. It is time to support the EDF petition.

Sincerely yours,

Susan M. Smith
